I wanted to follow up and point out that this issue was not simply something that I experienced as an individual, but rather it was experienced by the public at large.

Apparently there were so many complaints to DEQ, they couldn't keep up with, or respond to all of them. I will encourage other interested parties to make comments to the Council.

Mr. Morgan,

I am sorry that you had problems understanding Mr. Hayes. I contacted Mr. Vaughan this morning and he did receive your email. While he did respond to several individuals that sent similar emails, I apologize that he did not get a response to you.

The transcript along with the recording will be published within 10 days on the website with the other draft permit materials.

Jaime Robb

Ms. Robb,

I understand that the recording of last night's hearing will be available online within 10 days.

Will the transcript be available also? There were various points where Mr. Hayes was all but unintelligible. I sent Mr. Vaughn two emails about the issues and never heard back from him. I was unable to call, as you are no doubt aware, cell phone service in Hanover is poor as the result of recently destroyed tower. Since my land-line was used to call the hearing, I was unable to place a call to Mr. Vaughn directly.
